

KRISHAN MURARI

Full Stack Developer | C# • ASP.NET Core • Angular

+91 9115880673 | mrkrishanmurariji@gmail.com | krishan.is-a.dev

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable web applications using **C#, ASP.NET Core, Angular, and TypeScript**. Skilled in designing REST APIs, integrating AI technologies (OpenAI GPT-4o, Whisper, Ollama, Model Context Protocol) and third-party services (Stripe, SendGrid, BoldSign, DIDIT), and delivering end-to-end HRMS, telehealth, and SaaS solutions. Experienced with AI-assisted development tools to accelerate delivery and improve code quality.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core Web API, Entity Framework Core, REST API Architecture, Python, Node.js

Frontend: Angular, TypeScript, React, JavaScript, PrimeNG, Syncfusion, ngx-charts, ApexCharts

Databases: SQL Server, MySQL, MongoDB, SQLite

Cloud & DevOps: Microsoft Azure, Azure Blob Storage, Azure DevOps, Docker, CI/CD Pipelines, Git

AI / LLM: OpenAI GPT-4o, OpenAI Whisper, Ollama (Qwen3), Telnyx Voice AI, Model Context Protocol (MCP)

Integrations: Stripe, SendGrid, Zoho, DIDIT, BoldSign, Google Workspace APIs

Frameworks & Tools: ABP.IO, Avalonia UI, .NET WinForms, Visual Studio, VS Code, Postman

PROFESSIONAL EXPERIENCE

Associate Software Engineer Consultant

May 2026 – Present

Ariel Software Solutions Pvt. Ltd. | India

Ariel HR — Human Resource Management System (HRMS)

Tech Stack: ABP.IO, ASP.NET Core, C#, Angular, MySQL, Entity Framework Core, REST APIs, Ollama (Qwen3 LLM)

- Developed core HRMS modules including Attendance, Leave, Regularization, Recruitment, Offboarding, Payroll, Helpdesk, and Asset Management.
- Built responsive Angular interfaces integrated with ASP.NET Core REST APIs on the ABP.IO framework.
- Integrated Ollama (Qwen3 LLM) to parse resumes, invoices, and warranty documents, automatically extracting data to pre-fill candidate and asset forms and reducing manual data entry.
- Implemented role-based access control and reporting features; diagnosed and resolved production issues to improve performance and user experience.

Biomatrix — Google Workspace MCP Integration Platform

Tech Stack: Node.js, JavaScript, Model Context Protocol (MCP), Google Sheets / Docs / Drive APIs

- Designed and developed a custom MCP server connecting Claude AI to Google Sheets, Docs, and Drive.
- Implemented create, read, update, delete, move, rename, and formatting operations for Google Workspace files via Google APIs.
- Built approval workflows, audit logging, and revision management to enable secure, traceable AI-driven document operations.

Software Engineer I

Apr 2024 – Feb 2026

Vineforce IT Services Pvt. Ltd. | Mohali, India

Mortho.ai — AI-Powered Orthopedic Telehealth Platform

Tech Stack: ASP.NET Core, Angular, Python, .NET WinForms, SQL Server, GPT-4o, Whisper, Telnyx Voice AI, PrimeNG

- Built a WinForms desktop application that records live consultations and streams audio to a Python backend running OpenAI Whisper for real-time transcription.
- Integrated GPT-4o to auto-generate structured clinical notes from transcripts, surfaced in the doctor's web dashboard for review and single-click approval.
- Engineered a Telnyx Voice AI system that automatically calls patients post-consultation, reads recovery notes aloud, and answers follow-up questions in real time using GPT-4o mini.

- Developed the full Angular patient management dashboard, including consultation history, note approval workflows, and patient tracking.

Excis Compliance — Global Workforce Management SaaS

Tech Stack: ASP.NET Core, Angular, SQL Server, Azure, Stripe, Syncfusion Scheduler, PrimeNG, SendGrid, Zoho, DIDIT, BoldSign

- Implemented the full Stripe subscription billing lifecycle: plan selection, invoice generation, renewals, and automated payment-failure recovery flows.
- Built a multi-timezone shift scheduling module with Syncfusion Scheduler featuring a drag-and-drop manager interface for global workforce operations.
- Developed a leave management system with multi-level approval workflows and automated SendGrid/Zoho email notifications on every status change.
- Engineered a secure employee onboarding pipeline combining DIDIT identity verification and BoldSign e-signatures, granting system access only after both steps completed.
- Designed real-time analytics dashboards using ngx-charts and ApexCharts for headcount, shift coverage, and compliance visibility.

Vineforce Teams — Cross-Platform Employee Activity Tracking Tool

Tech Stack: C#, ASP.NET Core, Avalonia UI, .NET WinForms, SQL Server, Azure Blob Storage

- Built the core background tracking engine: keyboard/mouse activity capture, periodic screenshots, and automated productivity scoring.
- Implemented a screenshot upload pipeline to Azure Blob Storage via ASP.NET Core APIs, rendered in the manager dashboard with timestamps and activity annotations.
- Contributed to migrating the client from WinForms to Avalonia UI, enabling a single codebase to run natively on Windows, macOS, and Linux.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024

I.K. Gujral Punjab Technical University (IKGPTU) | Punjab, India | 86.4%
